

A Business of Our Own Grade 6

Get a head start with Business Basics! This program provides practical information to elementary students about the organization and operation of businesses in their community.

Students in grade 6 learn through the hands-on activity of operating their own retail business. They learn about business plans and develop one of their own, learn how teams work together and about marketing strategies and the importance of financial record keeping.

Your Junior Achievement Experience

Like other Junior Achievement programs, the Business Basics Series is curriculum-linked, student centered and skills focused. Each program can be delivered by a trained and inspiring volunteer in 5 one-hour sessions or 2 half-day sessions.

There is no cost to your school for this program. It is funded by businesses, service clubs and foundations.
