The fast pace of Stock Market Challenge makes for a terrific team dynamic! Strategy is essential and split second decisions are vital. May The Best Traders Win!

- STEP 1** Teams begin the game with \$500,000 trading dollars to invest in fictitious stock.
- STEP 2** Once the trading begins every 80 seconds is a new trading day in a volatile market! Players track their stock portfolio and team standings on three massive screens at the front of the room.
- STEP 3** Teams buy and sell stocks from student runners equipped with hand held computers that instantly send trades to the system. Teams may add to their portfolio through real dollar purchases of additional 'trading dollars'.
