

Our Country - Technology and Innovation

Take students on a fast-forward trip to Canada's future. Our Country - Technology and Innovation engages elementary school students in activities to define new ideas for business and society by learning about our technological past and present. Enter the next generation of creativity and invention.

Build a Better Tomorrow

Lead an exploration of our major business sectors and the contributions of Canadian inventors. Our Country - Technology and Innovation helps students discover the value and necessity of change in economic and social progress. New trends build a future of inspiring concepts and entrepreneurial ideas. Our path to a better tomorrow begins today.

- Draw the connections between traditional and modern technologies
- Match Canadian inventions with those who developed them
- Bid to bring new technologies to market in a class auction
- Experience a day in the future by inventing new devices

Your Junior Achievement Experience

Like other Junior Achievement programs, Our Country - Technology and Innovation is curriculum-linked, student centred and skills focused. It can be delivered by a qualified business volunteer once per week for 40-60 minutes over a four week period, at no cost to schools or groups.

For more information about this and other programs please call 1-800-265-0699 or visit www.jacan.org.

Students Achieve

Understanding of the impact progress has on business and society

Greater ability to comprehend, describe and respond to change

Desire to invent solutions to meet our current and future needs

"What I liked about the JA program was the volunteers teaching us to plan towards the future!"
Student, Grade 4
